PROFILE

As a Senior Engineer, my experience working closely with users and stakeholders has strengthened my ability to understand requirements, identify pain points, ask the right questions, and translate business needs into practical solutions.

I bring a combination of client-facing experience, stakeholder management, analytical thinking, and technical skills to solving business problems.

One of my key strengths is my ability to bridge the gap between stakeholders and technology. I believe effective problem-solving starts with understanding the people and the problem before working toward the solution.

EDUCATION

B.E Bachelor of Engineering (EEE)
East Point College of Engineering and Technology
2014 - 2018

TECHNICAL SKILLS

- Advanced Excel
- SQL
